Longer Wearlife parts for Slats

**PT-4458**

**K-212**

**3/8" x 2" x 12"**

Kenco's slat end protector will greatly extend the life of your slat. This bolt-on part is reversible and will protect the slat ends from premature wear and rounding off. By keeping your slat ends at 90 degrees, you eliminate the build-up which occurs as the slat rounds off, creating better efficiency.

As slats wear, they can also "crown" in the middle leaving gaps... By installing Kenco's K-212 wear plates, you will keep your slat straight for the life of the slat.

## Benefits:

- Keep your slat at 100% efficiency for longer than ever before
- Parts are reversible so they will last longer
- Components can be bolted on or welded on with Kenco's weld washer
- Kenco can also supply the complete slat as an assembly
- Kenco's slat end protectors are cast from the same long-wearing alloy as our 700 BHN floor plates. Call for more details!

*Still proudly made in the USA*
